Taxi services at Vilnius airport

Attention: Price for taxi, sometimes called cheap taxi (Pigus taksi, Marton taksi, Airport taxi) which is offered at airport sometimes could be 20-50 Eur. It is not real price for the trip. This taxi company privatized the taxi stop at airport and tries to collect much more money than other taxi companies. So we don't recommend use this taxi company. If you want use this taxi negotiate initially on the price for trip Vilnius International Airport – Universiteto str. 3 or your hotel close to this place, not to be disappointed.

The **real price** for the trip Vilnius International Airport – Universiteto str. 3, which is <7 km long is <10 EUR. So we use other taxi companies which we invite by phone or email. When you invite taxi by phone or SMS it is cheaper in Lithuania. But other taxi companies not have right to stop at the taxi stop at the airport exit. They usually come to the departure area and after you ordered your taxi you must go up by elevator or steps one floor from arrival area to the entrance of the departure area.

In few taxi companies you could pay by credit cards, but in others you must pay in cash.

We recommend taxi companies presented below. In SMART TAXI and A2B TAXI you could pay by card and take printed bill with distance and price. In other you could ask only for written version of bill.
